Subject: Reclamation of Basement Material

RECEIVED

APR 6 1981

J. G. KAUFMAN

Attached is a draft project outline addressing the question of reduction of contaminants, primarily Fe and Si, in reclaimed basement material.

Would you please critique this proposal. My primary concern is to have some assurance that what we have planned, based on our understanding of your situation, meets your requirements, needs and expectations.

Note to: R. W. Bartlett & J. G. Kaufman

This is an example of the technical assistance procedure that I suggested we establish in an earlier letter. Comments?
